Cennox

The perfect deterrent effect

THE SECURITY SMOKE SOLUTION

Defending attacks on your ATM

Our Security Smoke device has been specially developed to provide a low-cost protection solution for any ATM in an intelligent way. It's an autonomous and fully automatic ATM protection device that monitors and analyzes the ATM's security status.

Facilities. Security. Technology.

If an attack occurs

The Security Smoke Device will release a thick cloud of red smoke that stains the ATM's contents and acts as a deterrent to stop the attack.

SAFETY ADVANTAGES

+ The Security Smoke system functions fully automatic and requires no intervention by personnel
+ It protects most ATMs regardless of age or condition
+ Warning labels are a deterrent to those considering attacking your ATM
+ System protects against forced door opening, pull-out, cutting or drilling

OPERATIONAL ADVANTAGES

+ No down time as the ATM is equipped according to schedule
+ SecuriSafe ATM works independently of normal operations
+ The system is compact and easy to install
+ Requires minimal maintenance
+ Optional tear gas and DNA available
+ Remote-controlled access

The Security Smoke device

Smoke products have deterred criminals for many years. Companies that rely on effective and immediate protection of their cash use these products to enjoy absolute peace of mind.
