

The LincstationCi

THE LINCSAFE PORTFOLIO | LI200C

The LincstationCi is a fully automatic Self Service coin roll dispenser machine, developed in-house, where the customer can buy up to 6 different coin rolls. Coins can be purchased by a pin payment. As the LincstationCi can also be placed in a retail environment, extra attention has been paid to safety in the design, where we used our years of experience of building smart safes.
