

i.nk+

THE MOST INTELLIGENT IBNS CLOUD-BASED SOLUTION

i.nk+ is our latest bank note staining solution, representing a fusion of our proven IBNS cassette technology with an innovative cloud-based platform. Emerging in response to evolving criminal tactics and to fulfill our customers' needs, **i.nk+** offers a comprehensive suite of features tailored to enhance attack detection while enabling real-time monitoring, analytics, and asset management. It's more than just a security enhancement for your cash-handling devices—it's a gateway to an interconnected IBNS ecosystem.

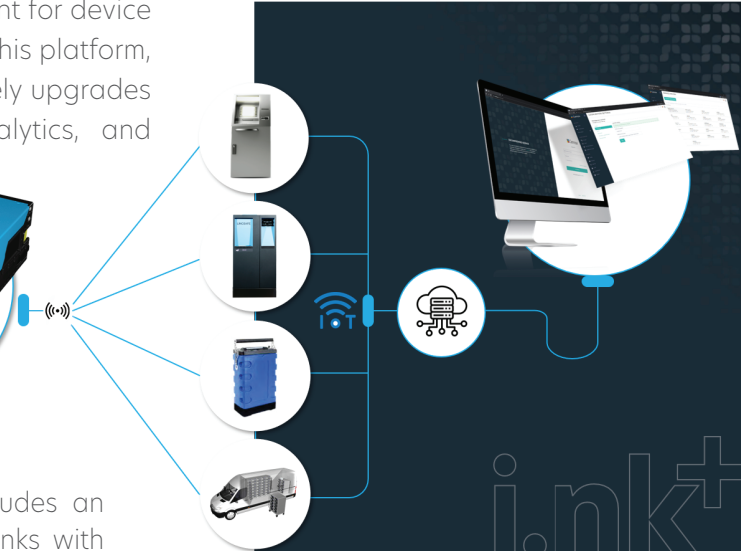

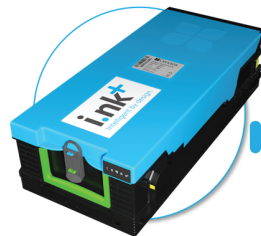

Why i.nk+

IT IS MORE THAN A PRODUCT. IT IS A SOLUTION!

LIVE MONITORING

Our cloud platform serves as a single access point for device control, monitoring, and management. Through this platform, you'll have access to real-time data, receive timely upgrades and maintenance, delve into advanced analytics, and troubleshoot issues remotely.

IMPROVED ATTACK DETECTION

Our intelligent bank note staining solution includes an improved staining system with state-of-the-art inks with DNA markers, all within modular designed parts for enhanced functionality and versatility.

WHAT IT OFFERS

i.nk+ is not just another bank note and currency staining solution – It's a proactive monitoring and management based theft deterrent that offers:

- + Real time monitoring and analytics
- + Advanced seismology sensitivity
- + Improved stability & reliability
- + Multi-vendor cassette options
- + CIT case homologation
- + DNA-tagged ink option
- + Scalable IBNS platform

WHEN IT ACTS

The **i.nk+** solution is an effective deterrent, built into cash cassettes and offering effective protection against:

- + ATM pull outs
- + Black box attacks
- + Gas attacks
- + Explosive attacks
- + Drilling and grinding attacks
- + Logical attacks
