

# Clean and compliant ATMs.

Benefit each time we visit, with nationwide reach and online visibility of images and reports for all sites.

---

## Procuring, installing and monitoring your ATM is just one important service we provide our customers - but what next?

Cennox can also provide support to ensure each ATM remains **compliant** with legislation and regularly **cleaned and inspected** to spot early signs of wear, vandalism or illegal interference.

# Compliance checks

We provide numerous on-site compliance services, surveys and device checks. We can also undertake any client specific checks and action any requirements on-site should they be required.

- + Lighting checks and corrections
- + ADA disability checks
- + Multi-point security check
- + Customer brand evaluation checks
- + Photographing each site before and after
- + Updating our online customer portal with images and report

## Regular cleaning and checks

Working with you, we can build a scheduled site visit and device clean plan to suit your needs. On site, our teams can undertake a number of checks and services which could include:.

- + Light wipe or full device clean
- + Device check for wear and damage
- + Multi-point security check
- + Customer brand evaluation checks
- + Photographing each site before and after
- + Updating our online customer portal with images and report

## Nationwide benefits

Covering a nationwide footprint and supporting many different makes and model of ATM, our teams are deployed with A.I supported technology for the most efficient movement of teams and real time site tracking and reporting.

Cennox is a trusted financial services partner and single point of visibility for all of your ATM compliance and cleaning requirements.

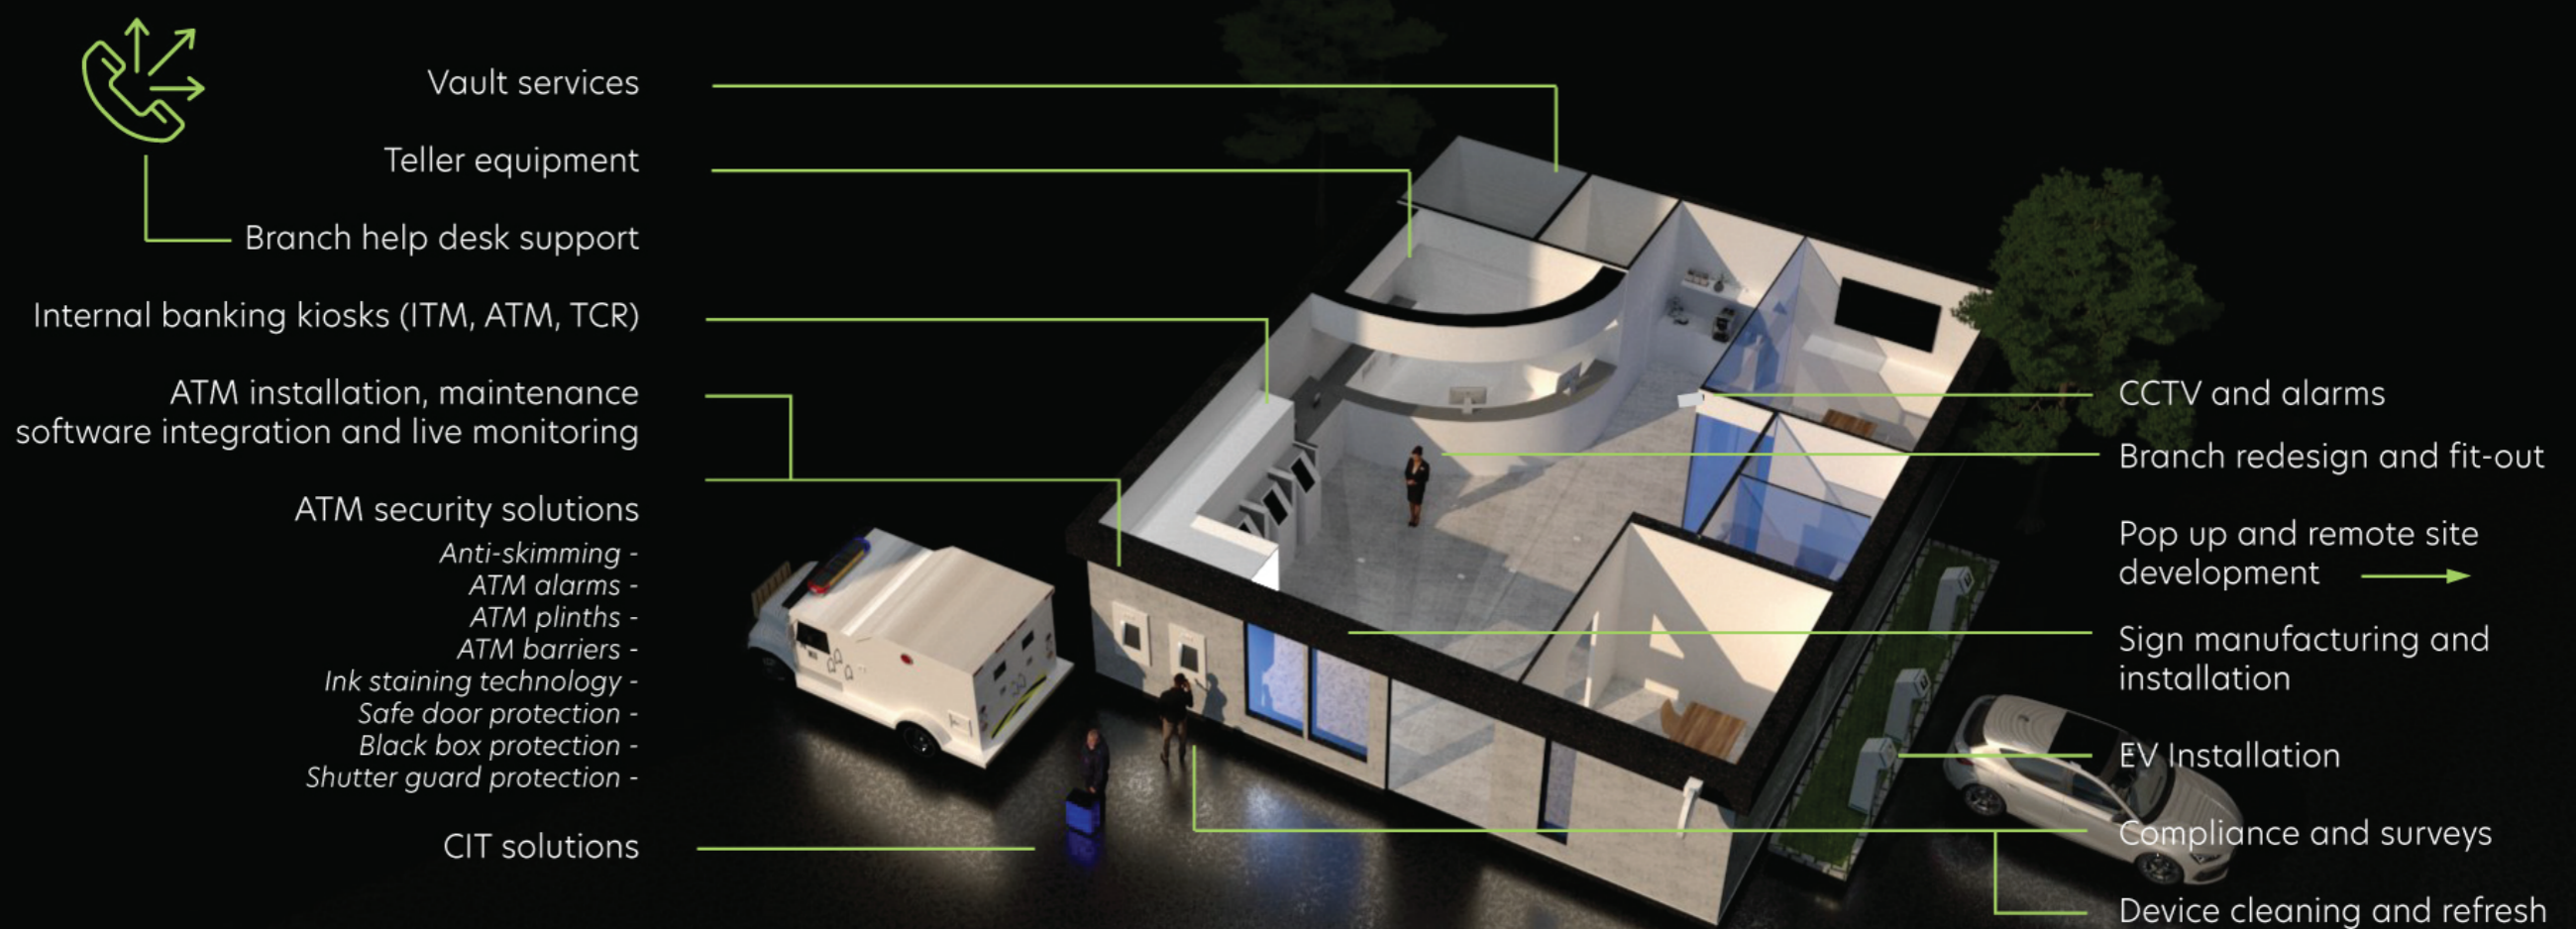

## Online visibility and reporting

With all images and reports uploaded while our teams are still on-site, customers have immediate access to all of their site activity, as well as past reports across their network.

Our operations team can also provide periodic MI Data Reports, giving customers regular reviews and touch points on their service to demonstrate impact, actions and resolutions on any identified issues.

# One supplier supporting and reporting across your whole ATM network
