

The **LincLoc** portfolio

Advanced safe lock systems

— **DESIGNED AND MANUFACTURED BY CENNOX**

Three innovative locking systems designed to protect your safes

LincLoc Core

Programmable with up to 30 users including options for 2 manager codes, the **LincLoc Core** controls access to your safes to only those who need it.

LincLoc Audit

The new cloud ready safe lock from Cennox, gives a flexible solution allowing you to manage, appoint, remove and amend access to each safe lock with options to upgrade to a portal based ID allocation.

LincLoc⁺

The new cloud enabled safe lock from Cennox, gives a flexible solution allowing you to remotely manage, appoint, remove and amend access to each safe lock on their network through a web portal. No more site visits, manual interactions or time delay when needing to change the access to any specific safe.

LincLoc Core

Advanced safe lock system

DESIGNED AND MANUFACTURED BY CENNOX

LincLoc Core

Advanced safe lock systems from Cennox

The smart logic device provides secure access to your safe. Programmable with up to 30 users including options for 2 manager codes, the **LincLoc Core** controls access to your safes to only those who need it.
